-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 5, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,320,250 to La et al.

La shows a dispenser as seen in Fig. 1 having a syringe, see Fig. 4, a nozzle 38b, a plunger 34, a pipe 26 connected to a portion of the syringe between the nozzle and the plunger, a liquid material tank 10 connected to the other end of the pipe 26, the liquid material tank is arranged so that the level of the liquid is higher than the syringe, see Fig. 1, a device 13 for applying pressure to the liquid, a drive device 36 for moving the plunger, control means 120 for controlling the device, see Fig. 6, and a liquid material supply valve formed by the elements 30 and 33, see Figs. 3 and 4.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,320,250 to La et al. in view of US 5,570,815 to Ramsay.

Art Unit: 3754

La shows all claimed features as discussed above except for a filter arrange in the supply pipe. Ramsay shows a delivery system as seen in Fig. 1, having a filter 58 arrange in the supply pipe 50a and 50b. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of La to include a filter as taught by Ramsay to remove any impurities from the liquid material before is goes through the dispensing nozzle to help reduce maintenance.

Allowable Subject Matter

5. Claims 4 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1 and 3-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Peeler shows a hydraulically and volumetrically dispensing a target fluid.
